

High Marks from the Cities of Las Vegas and North Las Vegas

The cities of Las Vegas and North Las Vegas recently published the results of the Professional Engineering Service Statement of Qualifications rankings. You can imagine our excitement in discovering that GES placed at the top of the list.

North Las Vegas ranked GES #1 out of 20 firms for Geotechnical Services which includes Materials Testing & Inspection. In the Environmental category, we came in 2nd out of 22 firms. We were also delighted to learn that the only firm to place higher than GES for Environmental Services was Broadbent & Associates, a great company as well as a partner with us on many projects.

Las Vegas ranked GES #1 for Materials Testing & Inspection, defeating 13 other firms; 2nd for Geotechnical, and 7th out of 16 for Environmental.

Although we are extremely honored to hold these high marks, we understand they mean more than a good grade. They are a reflection of what sets GES apart. This is both our team of qualified staff and our business philosophy of always looking for ways to provide a GES Advantage to our clients.
