

GES performed a Phase II Environmental Site Assessment (ESA) for the Royal Links Golf Course located at Vegas Valley Drive, east of Las Vegas, in Clark County, Nevada. The Golf course consists of approximately 160-acres with structures on it (club house, maintenance building). The Phase II ESA sampling consisted of shallow soils sampling (.05 to 1-foot in depth) at selected locations throughout the subject site, as well as sludge and water samples from the pond at the southeast portion of the subject site.
